EXPERIENCE

Software Engineer

August 2024 – August 2025

Rutgers Center for Cognitive Science (RuCCS)

New Jersey, USA

- Led development of a full-stack research platform using **Node.js**, **React**, and **PostgreSQL**.
- Optimized 10K+ records, cutting query response time by 68% through efficient indexing and query tuning.
- Secured high-traffic **RESTful APIs** (500+ req/sec) with **OAuth2**, Redis caching, and **Grafana** monitoring.
- Automated **CI/CD pipelines** using **GitHub Actions** and **Docker**, shortening release cycles by 70%.
- Built a **Redis**-powered real-time activity tracker, lowering latency by 50ms across user sessions.

Software Development Intern

January 2021 – March 2022

Bell Teleservices

Bengaluru, India

- Deployed **Java**-based microservices with **Spring Boot** on **AWS**, reducing latency by 30% for 6,000+ daily users.
- Designed a feature toggle system with **.NET Core**, **React**, and **SQL Server**, cutting deployment errors by 40%.
- Streamlined deployments by automating rollout pipelines, boosting upgrades by 12% and adding \$50K in revenue.
- Collaborated with a 7-member cross-functional **Agile** team to deliver bi-weekly feature releases.

Software Engineer - Research Assistant

August 2020 – December 2020

PES University

Bengaluru, India

- Automated a machine learning pipeline for satellite/sensor data using **Python**, boosting data throughput by 40%.
- Integrated **AWS** (S3, RDS, IAM) for secure distributed storage & scalability, reducing processing costs by 15%.
- Partnered with QA and DevOps teams to implement **CI/CD pipelines**, reducing deployment time by 60%.

PROJECTS

Real-Time Social Media Sentiment Analysis Dashboard | *Python, FastAPI, DynamoDB, React*

- Built an AI-driven sentiment dashboard with **FastAPI**, **VADER** and **BERT**, processing 10K+ tweets/hour.
- Automated **NLP** pipelines on **AWS Lambda** to deliver real-time insights from 50K+ social media posts daily.
- Integrated AWS S3 and **DynamoDB** for scalable data storage, improving query performance by 40%.
- Deployed the system on **AWS Elastic Beanstalk** with CI/CD via GitHub Actions.

SavorOps - Fault-Tolerant Order Processing System | *Java, Spring Boot, Kafka, Docker*

- Designed a distributed system with **Spring Boot** and **Kafka** to process 2K+ events/day at 60ms latency.
- Automated deployments and fault recovery workflows, ensuring stability under load.

PathFinder | *Angular, GraphQL, PostgreSQL, Node.js, Docker*

- Developed a full-stack LMS with **Angular**, **GraphQL**, and **PostgreSQL**, improving system efficiency by 22%.

TECHNICAL SKILLS

Languages:	Python, Java, JavaScript, C++, C#, HTML/CSS3
Technologies:	Node.js, React, Spring Boot, .NET Core, Angular, FastAPI, GraphQL, Docker, Kubernetes
Tools:	Git, GitHub, Jenkins, Postman, Bash (Shell Scripting), Tableau, Agile Methodologies, CI/CD
Cloud:	AWS, GCP, Microsoft Azure, Elastic Beanstalk, Azure DevOps
Databases:	MySQL, Microsoft SQL Server, PostgreSQL, MongoDB, DynamoDB, Redis, NoSQL

EDUCATION

Rutgers University

September 2023 – October 2025

M.S. in Software Engineering

New Brunswick, NJ

- **Teaching Assistant:** CS170: Computer Applications for Business (Fall 24 & Spring 25)

PES University

August 2019 – June 2023

Bachelor of Technology in Electronics and Communication Engineering

Bengaluru, India

PUBLICATIONS

“Effect of Climate Change using Predictive Models with Remote Sensing Data,” in **IEEE CSPA**, 2023,
